OBJECTIVE:

AI Engineer with 2 Years experience in LLM fine-tuning, embedding model development, and AI pipeline design for production-ready applications. Skilled in building AI agents, proficient in deep learning, ML, with a foundation in development to deliver end-to-end scalable AI solutions. Adopt at optimizing model performance, deploying scalable architectures, and driving innovation through applied AI research and engineering.

PROFESSIONAL EXPERIENCE:

Quanticept AI

Nov 2025 – June 2026

AI/ML Engineer

Building LLM based applications, Langchain, Langgraph, xAI, LLM Finetuning (unsloth, axolotl), RAG Solutions, AWS Sagemaker, Bedrock, ECS/EC2 deployment, Docker, Git, CI/CD and FastAPIs. Implemented openai guardrails/moderation on LLM applications.

National University of Sciences and Technology

May 2025 – Feb 2026

AI Research Assistant

Worked on Nadra and Jazz Dataset and made Custom Algorithm. Fine-tuned LLMs using PEFT, LoRa and QLoRa methods for multilingual and task-specific use cases (e.g., Urdu/Arabic transliteration). Built custom datasets for low-resource languages. Did Data Analysis and Scrapping, Worked on multi-agent systems (LangGraph, MCP) and optimized LLM inference and deployment. Created Embedding models and evaluation pipelines for Low resource languages (e.g Urdu, Punjabi).

ITSOLERA Pvt Ltd Islamabad

Jun 2024 – Sept 2024

AI/ML Intern

Built RAG-based systems using LangChain for domain-specific applications including education, healthcare, and customer support, enabling context-aware question answering. Gained hands-on experience in **prompt engineering** and AWS Bedrock and SageMaker.

Big Data Business Intelligence Pvt Ltd (UK)

Feb 2023 – May 2023

Mobile App Developer

Developed cross-platform mobile applications using React Native for diverse domains including e-commerce, business management, and record-keeping. Built robust backends in JavaScript and Node.js, integrating databases such as SQLite, Firebase, and MongoDB. Delivered responsive, high-performance apps with seamless frontend-backend integration and optimized user experience across Android and iOS platforms.

EDUCATION:

National University of Sciences and Technology

Islamabad, Pakistan

BE Software Engineering (CGPA: 3.7)

2022 – 2026

WRITINGS AND PUBLICATIONS:

- Testing Chatbot Systems using Agentic AI approach (Journal - IJIST)
- Securing the source: Blocking Knowledge-Base injection attacks on RAG (Submitted - IEEE)

COURSES AND CERTIFICATIONS:

- AWS Cloud Practitioner Essentials (AWS)
- Machine Learning Specialization (DeepLearning.AI)
- Post-Training of LLMs (DeepLearning.AI)
- LangGraph Essentials (LangGraph)
- MCP: Rich Context AI Apps Building (DeepLearning.AI)
- Data Analytics (DigiSkills.pk)
- Data Science (iNeuron.ai)

PROJECTS:

INSPECTRA AI (FYP)

AI automated code testing tool, built on LangGraph and crewAI architecture, provides code static and dynamic testing and SQL query optimization using AI agents, will be provided as python library. (and IDE extension later). Provide code smelling, readability improvements, dynamix error/exception testing and code correction and detailed report generation.

Voice integrated Medical Chatbot

AI-powered chatbot with voice input/output capabilities to assist prescriptions and appointment in nearby hospitals using realtime map functionality. Integrated speech recognition for seamless user interaction.

Ask Deen : Islamic Mobile Application

Enhanced search functionality through Retrieval-Augmented Generation (RAG) by creating a vector database and knowledge base of Quranic ayahs categorized by topics and subtopics; implemented web scraping to enrich content sources.

OpenTendr: Automating Digital Transactions

Created a system that automates the digital currency transactions via digital Wallets (BASE). Making transaction completion process just one click (Deeplink or QRCode scan).

Chatbot QA Testing System using Agentic AI

(Research)

Automate QA testing using agent-based AI to evaluate chatbot responses for accuracy, coherence, and completeness across various scenarios and datasets. Chatbot security and Hallucination performance measurements, etc.

Attendance System using Facial Recognition

Attendance system using facial recognition with integrated database. Implemented it on hardware (esp32-cam) to make it useful for real use.

TECHNICAL SKILLS:

AI & ML:	Python, LangChain, LangGraph, Transformers, Vector Db, Streamlit, Flask, FastAPI, Unsloth, VAPI, Make/n8n, LLM Guardrails
Cloud & Dev:	React Native, Node.js, Docker, Git, SQL/no-SQL Databases, Web Scraping, AWS Bedrock, Sagemaker, AWS Storage and Database
Data & Analytics:	Excel, Power BI, Tableau, SQL, MongoDB, Data Wrangling
